

## Indiana Dunes National Lakeshore

### Deer Management Plan Public Scoping Open Houses

Your participation is vital to our analysis process. Because of your interest in Indiana Dunes National Lakeshore we are requesting your input in this important process to help the National Park Service develop management alternatives that will be analyzed in the Deer Management Environmental Impact Statement (EIS). More detailed information will be available at the scoping meetings about the proposed plan. Preliminary alternatives will be available for your review, and you will have the opportunity to comment. Because the EIS will analyze many complex social and ecological issues, your participation is encouraged and needed.
